- [1] Charter ID number
- [2] Target: Where are you exploring? It could be a feature, a requirement, or a module.
- [3] Resources: What resources will you bring with you? Resources can be anything: a tool, a data set, a technique, a configuration, or perhaps an interdependent feature.
- [4] Information: What kind of information are you hoping to find? Are you characterizing the security, performance, reliability, capability, usability, or some other aspect of the system? Are you looking for consistency of design or violations of a standard?
- [5] Passed: The charter works as expected

Blocked: The charter can't be executed due a dependecy which is not done yet (Change of scope or a decision made)

Not Applicable: The charter It is not part of the scope of the story

Fail: There is a open bug for that charter
